 - Various events across the globe
 - Check here: https://en.opensuse.org/openSUSE:Upcoming_events#2024

openSUSE Bulgaria

Overview and Plan

Overview of 2024 (first half)

- Events
 - TarnovoConf
 - TuxCon
- Meetings
 - None (except for this one) 😞

Plan for 2024 (second half)

- Events
 - Attend at all the events part of **IT Tour** (<https://it-tour.bg/>)
 - Attend at **OpenFest** (<https://www.openfest.org/2024/bg/>)
 - Cover additional events if possible/applicable/invited
- Meetings
 - No promises. Stay tuned 😊
- Other initiatives (that are baking)
 - Start the **Linux Essentials Study Group**
 - Finally, start the **SUSE Certified Administrator Journey**

openSUSE Technical

openSUSE Leap 15.6

Release Overview *

- **Removals**

- Bumblebee packages (superseded by NVIDIA SUSE Prime)
- Multiple unmaintained Python packages
- KDE 4 and Qt4

- **Changes and Additions**

- New 4096 bit RSA RPM and repository signing key
- Newer Kernel (6.4.0)
- Cockpit web interface

* For details go to: https://doc.opensuse.org/release-notes/x86_64/openSUSE/Leap/15.6/index.html

Leap Future *

- **Certain**

- The **line will continue** with **Leap 16**
- It will be based on the new **Adaptable Linux Platform (ALP)** codebase

- **Possible**

- Both non-immutable and immutable installation options are set to remain
- Additional service pack (15.7) may be released

- **Uncertain**

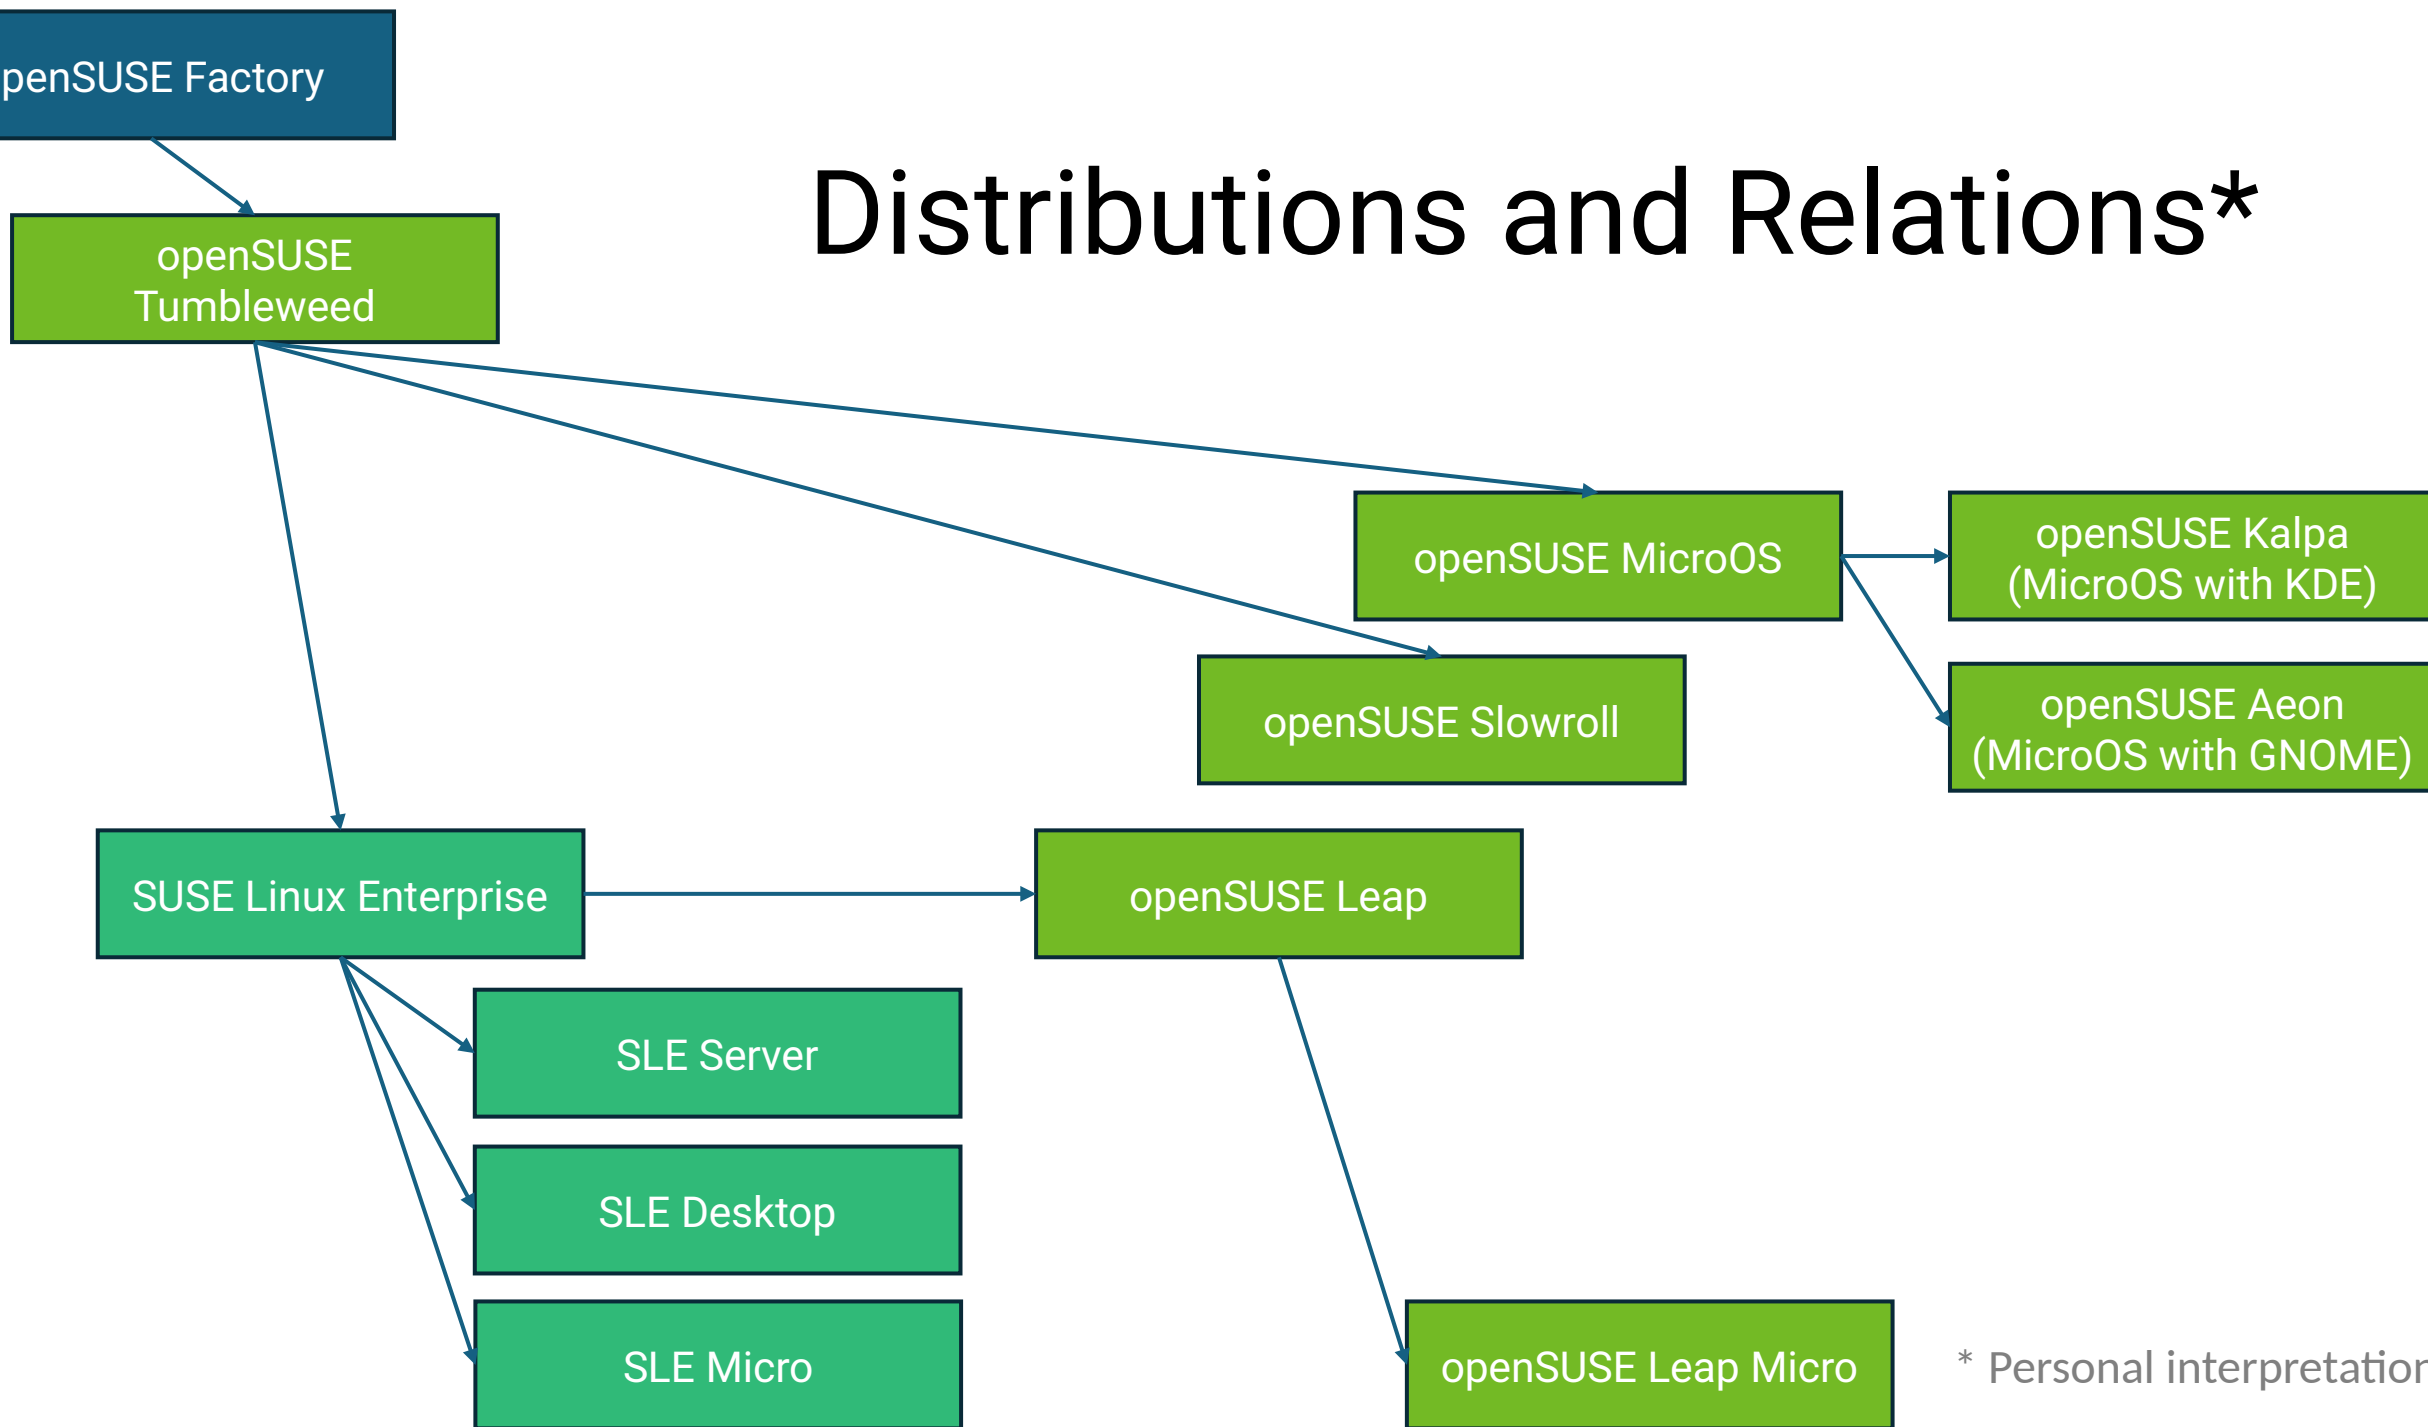

- How the change will affect the community and the adoption of the distribution

* Personal interpretation, mostly based on: <https://news.opensuse.org/2024/01/15/clear-course-is-set-for-os-leap/>

openSUSE Technical

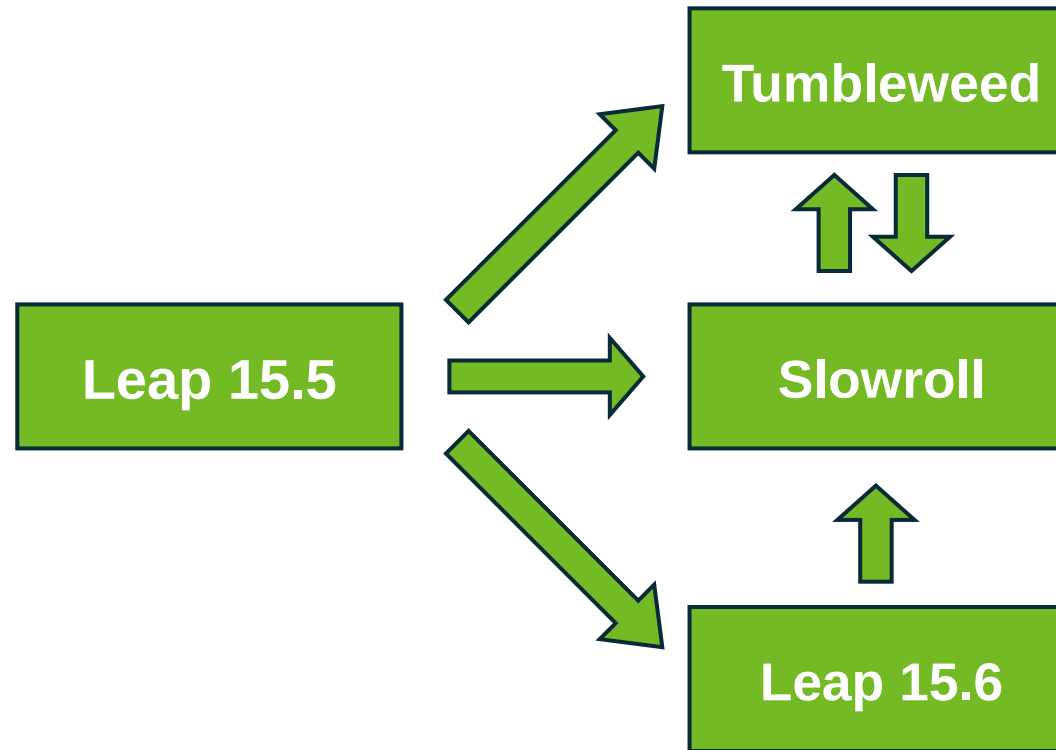

Distributions, Relations and Migration

Distributions and Relations*

* Personal interpretation

Migration Options *

* Check the notes in the published presentation

Demo Time

A (not so) Short Demo
